Part 1, Microsoft SQL Server Management Studio:

1. Execute the SQL Query "UberTapp.sql"
2. Needs to be done first (!important)

Part 2, Visual Studio:

1. Unload Project
2. Reload Project
3. Clean Solution
4. Build Solution
5. Change → connectionString="Data Source=your-localhost;Initial Catalog=UberTappDevelopingDb;Integrated Security=True" in Web.config
6. Also, in Web.config change (<paypal>)→

```
<add name="clientId" value="your-clientId" />
<add name="clientSecret" value="your-clientSecret" />
```

7. In "EmailsController.cs" change →

```
smtp.Credentials = new NetworkCredential("Your-Email", "Your-Password");
```

8. In "VenueProfile.cshtml" change →

```
<script
src="https://maps.googleapis.com/maps/api/js?key=YOUR_API_KEY&callback=initMap&libraries=&v=weekly"
defer></script>
```

9. Build Solution (again)
10. Save All
11. Open Package Manager Console
12. update-database

Part 3, More Notes (!important):

1. Login Credentials for UberTapp Users → "UserCredentials.txt"
2. PayPal payment uses Sandbox Accounts
